

# RainKeeper™ Tank Level

RAINWATER TANK MEASURING SOLUTION

## SIMPLE AND ECONOMICAL

This universal pneumatic level gauge can be used for remote indication up to a distance of 165 feet. The unit features capsule movement, a measuring accuracy with  $\pm 3\%$ , zero correction adjustment and overpressure safety control. It is fully adjustable for tank heights between 3 and 9 feet. A reference pointer is provided for easy monitoring of consumption. The high impact resistant plastic housing is designed for wall mounting. The standard gauge displays percentage of filling height. Custom scales are available at an additional cost. The gauge is available separately or included within a complete installation kit. No power is required for operation.
